

Campbell Press Repair Summer Engineering Internship 2026

This 12-week summer Engineering Internship at Campbell Press Repair begins on Monday, May 11, 2026, and concludes on Friday, August 07, 2026. Your pay for the Engineering internship is \$24 per hour. Here's a review of general information about the position:

Scope of Work

- As the Engineering intern, you will assist the Engineers in all tasks in-house engineering process:
 - Produce CAD drawings.
 - Clean and prepare parts for inspection.
 - Non-destructive Testing (NDT) Inspection.
 - Assist in inspection process.
 - Create Engineering Reports.
 - Learn and use Hexagon digital micrometer and software.
 - 3D Forge Press Model Printing Project
 - Fork Truck certification
- On-site inspection assistance – some travel required.
- Opportunity to learn basic welding and machining skills for your work in the FUS Baja SAE Team (after hours).

Hours of Work

Monday – Friday from 6am to 4pm. Some Saturdays may be required based on scheduled work.

Work Attire

- You will need to purchase your own steel-toed boots.
- Uniforms and additional PPE are provided to you for the duration of your internship.
- You will also receive Campbell logo wear.

Housing

You will be responsible for your housing. Summer rentals in East Lansing are available but go fast. It may be wise to arrange for your accommodation for the summer during your Christmas break.

On-Boarding

We have a comprehensive on-boarding process that will guide you as you prepare for and begin your work at Campbell.
